

# Collaboration of cross border e-invoice exchange between Finland and Japan

One Japanese company succeeded in sending “Peppol e-invoice” to Finnish Government Agency, with cooperation of Peppol Authorities in both jurisdictions.

In Finland, a supplier who wishes to send an invoice to Finnish Government Agencies must use an invoice in electronic format that is compliant with the European Standard. It is also possible to send the invoice using the Peppol network.

Peppol Authorities in both Finland and Japan were exploring the possibilities of using the Peppol e-invoice and provided the necessary support.

Thanks for kindness of B2Brouter and Finnish Peppol Authority (Finnish State Treasury), the Peppol e-invoice was sent by the Japanese company appropriately and was processed smoothly and promptly by the Ministry of Social Affairs and Health Finland.
