

## **Announcement of “PINT” and “Wildcard Scheme” implementation plan in Japan**

Issuer: Japan Peppol Authority

Issue Date: 1<sup>st</sup> September 2023

Update Date: 30<sup>th</sup> September 2024

Japan Peppol Authority (Japan PA) is pleased to announce the PINT and Wildcard implementation plan in Japan.

### **1. PINT Customization ID**

In July 2023, Japan PA published three Peppol PINT-based specifications for Japan:

- Peppol BIS Standard Invoice JP PINT
- JP BIS Self Billing Invoice
- JP BIS Invoice for Non-tax Registered Businesses

These specifications have the following PINT Customization IDs.

#### ***Peppol BIS Standard Invoice JP PINT***

*urn:peppol:pint:billing-1@jp-1*

#### ***JP BIS Self Billing Invoice***

*urn:peppol:pint:selfbilling-1@jp-1*

#### ***JP BIS Invoice for Non-tax Registered Businesses***

*urn:peppol:pint:nontaxinvoice-1@jp-1*

Therefore, Japan PA requires that all Peppol Certified Service Providers in Japan use those PINT Customization IDs.

### **2. New Document Type Identifier Scheme**

In July 2024, OpenPeppol released eDEC Code Lists v 8.9. In that version, about JP PINT, all Document Type Identifiers with “busdox” were deprecated.

Therefore, Japan PA requires that all Peppol Certified Service Providers in Japan use “peppol -doctype-wildcard” as Peppol Document Type Identifier Scheme from 1<sup>st</sup> October 2024.
