

Workshop in Sorrento, Italy

Mr. Hiroyuki Kato, a leader of Japan Peppol Authority (PA), is officially invited by the city mayor Mr. Coppola to the workshop called “Pescado AL Futuro” in Sorrento, Italy.

After each catch, data (location, type of fish, photo etc.) is registered in the application and 2D code is created.

**Together with the city mayor
Mr. Coppola**

The scope of the workshop is to recognize the possibilities of using digital tools. During the workshop, the participants experience that they scan the 2D code of “Today’s Catch”. They can access the data very easily.

Mr. Mario, owner of “Donna Sofia” , the famous restaurant in Sorrento

In addition, the application has a function to create Peppol e-invoice. The required data can be taken automatically to an e-invoice.

Mr. Mario, the owner of the famous restaurant in Sorrento, is high interested in the workshop and mentions the possibility to become a “monitor” of the application.
